

PHILODENDRON BIRKIN

Plant Care Sheet

LIGHT

Birkin thrives from bright, indirect light.

TEMPERATURE

The ideal temperature range is 64°F to 75°F (18°C to 24°C).

WATERING

Water about once per week. You want slightly moist soil.

HUMIDITY

They love high humidity. Keep over 60% for best results.

PROPAGATION

Philodendron Birkin is best propagated through stem cuttings.

GROWTH

Indoor Philo Birkin can grow from a foot and a half to 3 feet in height.

TOXICITY

Philodendron plants are toxic. If ingested it can irritate the throat, cause swallowing problems and more. Keep away from children and pets.

SOIL

The soil needs to be on the loose side but not too loose. It has to retain water.

(RE)POTTING

Once the roots reach the bottom of the pot, it's time to move them to a bigger pot.

PESTS & DISEASES

This plant is very susceptible to spider mites. Spray neem oil or use rubbing alcohol to keep pests at bay.

FERTILIZER

A balanced liquid fertilizer is a perfect choice.

COMMON PROBLEMS

BROWN LEAVES: If your Birkin has brown leaves, then it could be that it does not get the necessary humidity. Remember: Philo Birkin loves humidity!

YELLOW LEAVES: When your leaves are yellowing around the edge and are drying up, it most probably means you're over-watering your Philo Birkin.
